

2.2

Solving Inequalities by Adding and Subtracting

Your Name

Mrs. T

/ /

Notes

Objective: To be able to solve inequalities using addition or subtraction of constants. To be able to graph inequality solutions found. To understand what the solutions are.

Virtue/Skill: When we graph inequalities we might need to solve for a variable in order to graph it. With two variables on a coordinate plane, we need to be able to check our solutions to understand how to shade. Graphing on a number line is similar to graphing on a coordinate plane.

Remember:

 $<$ 

open circle on number line

 $>$ \geq 

closed circle on the number line

 \leq

Solving Addition/ Subtraction Inequalities

To solve:

1. pretend like it is an = sign and do what you have always done
2. graph your solution set on the number line

Remember: closed (filled in) circle if =

open (not fill in) circle if not =

ex 1. $k + 3 > -2$

$$\begin{array}{r} -3 \quad | \quad -3 \\ \hline k > -5 \end{array}$$

$$k > -5$$

Check:

$$\begin{array}{l} (-4) + 3 > -2 \\ -1 > -2 \\ \text{Yes} \end{array}$$

Solve and graph

$$\begin{array}{r} u - 5 \leq 3 \\ +5 \quad +5 \\ \hline 4 \leq 8 \end{array}$$

Check

$$(8) - 5 \leq 3$$

$$3 \leq 3$$

True

$$\begin{array}{r} r - 9 \geq 12 \\ +9 \quad +9 \\ \hline r \geq 21 \end{array}$$

'greater than or equal to'

check!

$$(21) - 9 \geq 12$$

$$12 \geq 12$$

check 2.2

$$(22) - 9 \geq 12$$

$$13 \geq 12$$

yes

$$\begin{array}{r} c + 6 < 2 \\ -6 \quad -6 \\ \hline c < -4 \end{array}$$

not equal to
open circle

Watch out!

check -3

$$(-3) + 6 < 2$$

$$3 < 2$$

False

When the variable is on the right side

*** Inequality sign will not match the arrow

Solve and graph and rewrite so the variable is on the left

$$\begin{array}{r} -6 > n - 5 \\ +5 \quad \quad +5 \\ \hline \end{array}$$

$$\begin{array}{r} -1 > n \\ \text{rewrite!} \quad \text{strictly greater} \\ \text{not equal to } -1 \\ n < -1 \end{array}$$

n was on less than side

$$\begin{array}{r} \frac{1}{2} < 2 + a \\ -2 \quad \quad -2 \\ \hline \end{array}$$

$$\begin{array}{r} -1.5 < a \\ a > -1.5 \end{array}$$

a was on open bigger side

Check:

$$\begin{array}{ll} -1 > 1 & -1 > (0) \\ \text{False} & \text{False} \\ -1 > 0 & \end{array}$$

Decimal
Inequalities

$$\begin{array}{r} x - 2.7 \geq -5.2 \\ \hline x \geq -2.5 \end{array}$$

$\begin{array}{r} 4 \overline{) 5.8} \\ \underline{-2.7} \\ 2.5 \end{array}$

↑
x is equal to -2.5

-3 -2.5 -2 -1.5 -1

✓ ✓ ✓

Take a
Step to
rewrite or simplify
before solving!

$$w - (-.32) \leq -50$$
$$w + 0.32 \leq -50$$
$$\begin{array}{r} -0.32 \quad -0.32 \\ \hline w \leq -50.32 \end{array}$$
$$\begin{array}{r} 50.00 \\ + 00.32 \\ \hline 50.32 \end{array}$$

Answer Key:

Pg. 65 #7,10,13,15,27,28

Challenge: pg. 65 #14,20,25

7. $x < -1$

10. $c > 8$

13. $w > -2$

15. $h \geq 8$

27. Graph going in wrong direction

28. 10 needed to be added to both sides, not just one

$$\begin{array}{r} -10 + x \geq -9 \\ +10 \qquad +10 \\ \hline x \geq 1 \end{array}$$

14. $q \leq 12$

20. $z > -9$

25. $38 + w \leq 50$
a.) $w \leq 12$

b) no, adding 14 lbs total does not work in the inequality, 14 is not a possible solution, it is not ≤ 12 .

Solve and graph the solutions

1. $w + 7 \leq 12$

2. $x - 9 > 14$

3. $-8 + y < 20$

4. $11 + a \geq 1$

Notice: the variable is not on the left

5. $7 < x - 12$

6. $15 \geq x + 35$

7. $21 \leq x - (-5)$

Notice: Numbers here are decimals.
Write out the work but use
a calculator to help you
add and subtract the amounts.

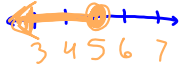

8. $2.50 + x \geq 17.99$

Solve and graph the solutions

$$1. \quad w + 7 \leq 12$$

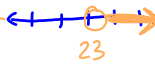

$$\quad \quad -7 \quad -7$$

$$w \leq 5$$

less than
or equal to

$$2. \quad x - 9 > 14$$

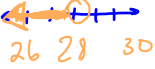

$$\quad \quad +9 \quad +9$$

$$x > 23$$

greater
than only

$$3. \quad -8 + y < 20$$

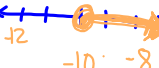

$$\quad \quad +8 \quad +8$$

$$y < 28$$

less than
only

$$4. \quad 11 + a \geq 1$$

$$\quad \quad -11 \quad -11$$

$$a \geq -10$$

greater than
or equal to

Notice: the variable is not on the left

$$5. \quad 7 < x - 12$$

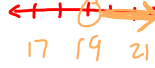

$$\quad \quad +12 \quad +12$$

$$19 < x$$

rewrite

$$x > 19$$

x is greater than 19

$$6. \quad 15 \geq x + 35$$

$$\quad \quad -35 \quad -35$$

$$-20 \geq x$$

-20 is greater than x
rewrite

$$x \leq -20$$

x is less than
or equal to -20

$$7. \quad 21 \leq x - (-5)$$

rewrite

$$21 \leq x + 5$$

$$\quad \quad -5 \quad -5$$

$$16 \leq x$$

rewrite

$$x \geq 16$$

Notice: Numbers here are decimals.
Write out the work but use
a calculator to help you
add and subtract the amounts.

$$8. \quad 2.50 + x \geq 17.99$$

$$\quad \quad -2.50 \quad -2.50$$

$$x \geq 15.49$$
