Summary of all Formulas

#1 and 2 apply to all polygons

1.) Sum of Interior Angles ..... $S_I = 180(n-2)$

2.) Sum of Exterior Angles ..... $S_E = 360$

#3 and 4 apply to only regular (or equiangular) polygons

3.) Measure of Each Interior Angle ..... $A_I = \frac{180(n-2)}{n}$ or $180 - \frac{360}{n}$

4.) Measure of Each Exterior Angle ..... $A_E = \frac{360}{n}$
